Clinical Instructor in Farm Animal Surgery (80-100%)

The Clinic for Ruminants at the Veterinary Teaching Hospital of the Vetsuisse Faculty, University of Bern, Switzerland, is seeking applications for a dedicated and skilled full-time or part-time Clinical Instructor in Farm Animal Surgery.

About Us

Join our expert team of 6 Diplomates (ECVS, ECBHM, ACVIM, ECAR), 6-8 residents, and a dynamic group of veterinary technicians. Our caseload, approximately 900 patients annually, is referral-based only, with 90% cattle and 10% small ruminants and camelids. We are located in a state-of-the-art facility that provides a stimulating environment and numerous opportunities for research collaborations.

Responsibilities

- Clinical service: 50-60%, participation in after-hours emergency services
- Teaching: 20-30%, clinical and didactic teaching of veterinary students and residents including lectures and practical courses
- Research: 10-20%, topics within the scope of the clinic's research foci (including animal welfare, claw health, reduction of antimicrobial use, digestive diseases, calf health and udder health) preferred but not mandatory

Qualifications

- Veterinary diploma
- Board certification or eligibility in large animal surgery (ECVS or ACVS) with residency completion by starting date
- Doctorate title (Dr. med. vet., MS, PhD, or equivalent academic qualification), and publications in the field of farm animal surgery according to academic experience

- Basic knowledge of German and/or French, and willingness to acquire sufficient proficiency in at least one language to communicate with students, staff and clients

Why joining Us?

- Outstanding environment: work with enthusiastic students, residents, and faculty specialists dedicated to providing excellent veterinary education and medical care
- Cutting-edge facilities: enjoy access to the latest technology and equipment in veterinary medicine
- Collaborative opportunities: engage in meaningful research collaborations within the faculty and with national and international partners
- Vibrant location: experience the beauty and cultural richness of Bern, Switzerland, offering a variety of entertainment and recreational activities

Additional information

Switzerland is famous for its agricultural industry with over 1.5 million cattle and 500,000 small ruminants, contributing CHF 4 billion annually to the country's economy.

The University of Bern is committed to equality and diversity, striving to promote women in leadership and support work-life balance.

Apply Now and become a part of a team that makes a difference in veterinary medical education, research, and clinical practice!

Applications including a **complete curriculum vitae** and a **letter of motivation** can be submitted electronically (as a single pdf-file) as of now and until the position is filled to:

ntk.personalwesen.vetsuisse@unibe.ch
